Modules

Master of Science in Economics & Master of Science in Public Economics: *Internationale Makroökonomie/Area Studies in Economic Policy*.

Master of Arts in East European Studies/Political Science/IR: *Vertiefung*.

This is a course on international and European macroeconomic theory and policy, which is offered under the auspices of the Jean Monnet Chair in External Economic Relations of the European Union (EUGLOBALECON). Within the context of EU policy decision-making, the first part of the course will concentrate on the balance of payment, models of intertemporal trade, international capital flows as well as solvency and debt crises. The second part of the course shifts toward models of international finance, including the Mundell-Fleming model. Finally, we discuss theoretical and empirical topics in European economic policy with a strong focus on the political economy of monetary policy and financial crises. Students are expected to become conversant with the analytical tools and theoretical discussions presented in the literature and related to EU economic and monetary integration. Slides, which have been graciously provided by Philipp Engler (IMF), will be used to facilitate the learning process.

Regular participation

75 percent attendance.

Active participation

Collective presentation (12 slides per person, 15 minutes per person) in the last three weeks of the semester.
