Contents

Contributors	vii
1 The Economics of Open Source Software Development: An Introduction	1
<i>Jürgen Bitzer and Philipp J. H. Schröder</i>	
2 Decoding the Free/Open Source Software Puzzle: A Survey of Theoretical and Empirical Contributions	15
<i>Maria Alessandra Rossi</i>	
3 Open Source Software: Free Provision of Complex Public Goods	57
<i>James Bessen</i>	
4 Intrinsic Motivations and Profit-Oriented Firms in Open Source Software: Do Firms Practise What they Preach?	83
<i>Cristina Rossi and Andrea Bonaccorsi</i>	
5 Business Models and Community Relationships of Open Source Software Firms	111
<i>Linus Dahlander and Mats G. Magnusson</i>	
6 A Statistical Analysis of Defects in Debian and Strategies for Improving Quality in Free Software Projects	131
<i>Martin Michlmayr and Anthony Senyard</i>	
7 Coworker Governance in Open-Source Projects	149
<i>Christoph Lattemann and Stefan Stieglitz</i>	
8 Bounty Programs in Free/Libre/Open Source Software	165
<i>Sandeep Krishnamurthy and Arvind K. Tripathi</i>	
9 An Organizational Perspective on Free and Open Source Software Development	185
<i>Sladjana Vujovic and John P. Ulhøi</i>	
10 Linux vs. Windows: A Comparison of Application and Platform Innovation Incentives for Open Source and Proprietary Software Platforms	207
<i>Nicholas Economides and Evangelos Katsamakas</i>	

11 The Impact of Entry and Competition by Open Source Software on Innovation Activity	219
<i>Jürgen Bitzer and Philipp J. H. Schröder</i>	
12 Application of Social Network Analysis to the Study of Open Source Software	247
<i>Jin Xu, Scott Christley, and Gregory Madey</i>	
Author Index	271
Subject Index	275

Contributors

James Bessen is Lecturer in Law at the Boston University School of Law and Director of Research on Innovation, USA. James Bessen is both a former software innovator and an economics researcher. He wrote one of the first successful desktop publishing programs in 1983 and was founder and CEO of a software company (Bestinfo, later a division of Intergraph). He studied economics at Harvard University and has taught the economics of innovation and patent policy at Boston University School of Law and at Bowdoin College. He has published widely in the areas of law and economics of patents, including software patents, and on the economics and economic history of technological innovation. He is one of the editors of the Technological Innovation and Intellectual Property newsletter.

Jürgen Bitzer is Assistant Professor at the Department of Economics and Institute for East European Studies of the Free University Berlin, Germany. He holds a PhD from the Technical University in Berlin, Germany, and has previously been Senior Economist at the German Institute for Economic Research. His research interests are in the field of knowledge spillovers, FDI, growth theory, and open source software. Jürgen Bitzer has carried out several major research projects including a number of studies on the Software Industry for the European Commission. His research has been published in, among others, *Applied Economics*, *Kyklos*, *Information Economics and Policy* and in *Economic Systems*.

Andrea Bonaccorsi is Professor of Economics and Management at the School of Engineering, University of Pisa, Italy. His current research interests are in the Economics of Science, Industrial Dynamics in high technology industries, and the theory and empirics of diffusion of technologies with network externality. He teaches courses on General Economics, Economics of Innovation, and Applied IO at undergraduate and graduate levels. His research interests in Open Source software deal mainly with processes of collective inventions and private provision of collective goods. He has authored and edited several books and approximately 80 papers in international journals and conferences. He is member of the Editorial Board of *Journal of Management and Governance*, and the journal *Darwin* established at the time of writing.

Scott Christley is a Doctoral Student in Computer Science at the University of Notre Dame, USA. He has a BSc/MSc in Computer Engineering from Case Western Reserve University, USA. He worked in the software industry for 12 years, including working at Oracle Database Company and starting his own software start-up with venture capital backing. He has worked extensively in the open source software community, and was a major participant in the GNUstep open source project. His research interests include social network analysis algorithms, open source software, and agent-based modeling.

Linus Dahlander was, at the time of writing, about to complete his PhD from Chalmers University of Technology, Sweden, and had concluded one year as visiting scholar at Stanford University. His research deals with new ways of organizing innovative work and the interplay between internal and external resources for firms. He has mostly worked on how firms can leverage user innovation with a particular emphasis on the relationships between firms and communities that work on a voluntarily basis in open source software. He combines qualitative in-depth case studies with quantitative network analysis. Linus Dahlander has published in, among others, *Economics of Innovation and New Technology*, *International Journal of Innovation Management*, *Research Policy*, and *Technology Analysis and Strategic Management*.

Nicholas Economides is Professor of Economics at the Stern School of Business of New York University, USA, and Executive Director of the NET Institute. He holds a PhD from the University of California at Berkeley, USA. His fields of interest include the economics of networks, especially of telecommunications, computers, and information, the economics of technical compatibility and standardization, industrial organization, the structure and organization of financial markets, application of public policy to network industries, and strategic analysis of markets. Nicholas Economides has published widely in the areas of networks, telecommunications, oligopoly, antitrust, product positioning, and on liquidity and the organization of financial markets and exchanges. He is editor of several journals including *Netnomics*, *The Quarterly Journal of Electronic Commerce*, *The Journal of Network Industries*, and has been advisor to major telecommunications corporations and to government agencies in the US, Greece, Ireland, New Zealand, and Portugal.

Evangelos Katsamakos is Assistant Professor at the Graduate School of Business of Fordham University in New York, USA. His research interests focus on the economics and business impact of open source software, strategic analysis of electronic commerce, economics of network structures, the impact of information technology on firm and industry structures, and knowledge management. Evangelos Katsamakos received a PhD from the Stern School of Business of New York University. At the time of writing, his work on Management Science

was about to be published and that on related business and economics journals was under review.

Sandeep Krishnamurthy is Associate Professor of Marketing and e-Commerce at the Business Administration Program at the University of Washington, Bothell, USA. He holds a PhD in marketing and economics from the University of Arizona, USA. He is interested in the study of the impact of information technology on individuals, communities and corporations. In the area of open source he has studied, among others, developer motivation, financial incentives, and corporate strategy. He has previously published in journals such as *Organizational Behavior and Human Decision Processes*, *Journal of Consumer Affairs*, *Journal of Computer-Mediated Communication*, *Marketing Letters*, *Knowledge and Technology Policy*, *Upgrade and Business Horizons*. He has edited a special issue on Open Source Software for *First Monday* and is associate book review editor at the *Journal of Marketing Research*.

Christoph Lattemann is acting-Professor at the Multimedia Campus of the University Kiel, Germany, and holds a junior-professorship at the Faculty of Economics and Social Science at the University of Potsdam, Germany. He has previously held senior positions in project management in the financial industry, and is regularly active as advisor on issues of electronic commerce, financial markets, and governance. He is the author of studies for governmental bodies in the Czech Republic and the State of Brandenburg, as well as several corporate partners. His research deals with social and business aspects of the Internet and the telecommunication industry. His work has been published in academic journals, and he is writing on topics of e-finance, corporate social responsibility and governance mechanisms in virtual organizations.

Gregory Madey is Associate Professor in Computer Science and Engineering at the University of Notre Dame, USA. He holds an MSc and PhD in Operations Research from Case Western Reserve University, USA. He has previously been the director of Advanced Projects and Strategic Planning at Loral Corporation, and has also held positions at NASA Glenn Research, Goodyear Aerospace, and Gould Corporation. His research interests include free/open source software, agent-based modeling, chaos and complexity theory, e-commerce, and e-science.

Mats G. Magnusson is Associate Professor in Innovation Engineering and Management at the Department of Technology Management and Economics at Chalmers University of Technology, Sweden, and Director of the Institute for Management of Innovation and Technology, Sweden. He holds a PhD from Chalmers University of Technology and has been visiting professor at Luiss Guido Carli University in Rome, Italy. His research interests cover a wide range of topics in the areas of innovation and operations management, with a particular emphasis on strategy and organization. His research interests in Open

Source Software include topics such as business models, and the development and management of communities. He has previously published in, among others, *Research Policy*, *Innovation: Management, Policy and Practice*, *International Journal of Entrepreneurship and Innovation Management*, *Knowledge and Process Management*, and *Journal of Small Business and Entrepreneurship*.

Martin Michlmayr is a Doctoral Student at the Centre for Technology Management at the University of Cambridge, UK. He holds Master degrees in Psychology, Philosophy, and Software Engineering from the University of Innsbruck, Austria, and the University of Melbourne, Australia. His research focuses on quality management and assurance in distributed, volunteer free, and Open Source Software projects. Martin Michlmayr has been actively involved in various free software projects for over 10 years. He used to be the Volunteer Coordinator for the GNUstep Project and acted as Publicity Director for Linux International. In 2000, Martin joined the Debian Project and was in 2003 and 2004 elected Debian Project Leader. He can be contacted at martin@michlmays.org.

Cristina Rossi is Post Doctoral Researcher at Department of Management, Economics and Industrial Engineering of Politecnico di Milano, Italy. She also collaborates with the Department of Electrical Systems and Automation of the School of Engineering, University of Pisa. She holds a Ph.D. in Economics of Innovation from Sant'Anna School of Advanced Studies, Italy. Her research interests cover the Economics of Innovation and Applied IO focusing on the empirical analysis of territorial and sectorial innovation processes. Her research interests in Open Source Software deal mainly with firms' involvement in the movement (business models, incentives, project participation). She has previously published in international journals and conferences.

Maria Alessandra Rossi is Researcher in Law and Economics at the Department of Economics at the University of Siena, Italy, and visiting scholar at the University of Paris X, France. She holds a PhD from the University of Siena, Italy. Her research interests cover Law and Economics, Political Economy and Competition Policy. Her research interests in Open Source Software cover topics such as the licensing structure of Open Source Software, the interplay between intrinsic and extrinsic motivations and the applicability of OSS principles to domains other than software. She has previously published in the *European Journal of Law and Economics*, in *Economia e Politica Industriale*, and for the Italian publisher "Il Mulino".

Philipp J. H. Schröder is Associate Professor in Economics at the Aarhus School of Business, Denmark. He has previously been a Senior Economist at the German Institute for Economic Research and has worked in management consulting. He holds a PhD in Economics from the University of Aarhus, Denmark.

His research interests are within international economics, the economics of Open Source Software, transition economics, and various issues surrounding European integration. His research on open source projects focuses on public good characteristics, contributor motivation, and innovation patterns. Philipp Schröder has published in: among others, *Journal of Economics*, *Journal of Regulatory Economics*, *Canadian Journal of Economics*, and *Journal of Comparative Economics*.

Anthony Senyard is a founding member of the Software Engineering Group within the Department of Computer Science and Software Engineering at the University of Melbourne, Australia. He completed a combined degree in Software Engineering and Science and holds a PhD from the University of Melbourne, Australia. His research interests include software engineering aspects of neural networks as well as of software quality systems. Anthony Senyard is also Fourth Year Advanced Software Engineering Project Coordinator. This role covers the organization, running and commercialization of student-based software engineering projects, i.e. the transforming of student projects into successful free and open source software projects. He has given numerous guest lectures and courses on Software Quality Systems, Software Engineering Projects, Software Engineering Principles, and Practices on Software Quality Systems.

Stefan Stieglitz is Research Fellow at the Department of Corporate Governance and e-Commerce and a member of the Graduate School of Modern Governance at the University of Potsdam, Germany. He previously studied business economics with an emphasis on finance and accounting. His current research focuses on governance in open source projects, which is also the topic of his doctorate studies that include empirical studies of changing incentives and life-cycle stages of open source projects. Stefan Stieglitz has presented his work at national and international conferences.

Arvind K. Tripathi is Assistant Professor at the Management Science Department, University of Washington, Seattle, USA. He holds a PhD in Management Information Systems from the University of Connecticut, USA. His research interests include open source software, electronic commerce, and email/mobile advertising. His research has been published in various information systems and marketing journals such as *Journal of Retailing*, *Decision Support Systems*, *Communications of the ACM*, and *International Journal of Mobile Communications*. He serves on the editorial board of *Journal of Database Management*.

John P. Ulhøi, is Professor in Organization and Management Theory at the Aarhus School of Business, Denmark, and Director of the Doctoral programme on Organization and Management Education in Denmark. His research interests include organizational genesis, emergent structures, innovation, and entrepreneurship. His research has been published widely including

in 24 different journals, including *European Journal of Operational Research*; *Journal of Business Venturing*; *Entrepreneurship, Theory and Practice*; *Management Decision*; *International Journal of Technology Management*; *International Journal of Manpower*. He has been editorial board member for different journals over the years and regularly acts as international evaluator for, e.g., the European Science Foundation and DG Research in the EU Commission.

Sladjana Vujovic is a PhD student at the Department of Management and International Business at the Aarhus School of Business, Denmark. Her areas of research include innovation management with focus on open source innovation and user-centred innovation processes. Her work has been presented at national and international conferences.

Jin Xu is a Doctoral Student in the Computer Science and Engineering Department at the University of Notre Dame, USA. She has a BSc/MSc in Operations Research/Finance from the School of Business and Administration at Chongqing University. Her research interests include web mining, data mining, and social network analyses of open source communities.
